## Question 1.

*Proof.* By rule induction on judgement  $s \text{ lparen}$ .

Case  $\frac{}{\epsilon \text{ lparen}} Leps$  where  $s = \epsilon$ :

$\epsilon \text{ mparen}$

by the rule  $Meps$

Case  $\frac{s_1 \text{ lparen} \quad s_2 \text{ lparen}}{(s_1)s_2 \text{ lparen}} Lseq$  where  $s = (s_1)s_2$ :

$s_1 \text{ mparen}$

by the induction hypothesis on  $s_1 \text{ lparam}$

$s_2 \text{ mparen}$

by the induction hypothesis on  $s_2 \text{ lparam}$

$(s_1) \text{ mparen}$

by the rule  $Mpar$

$(s_1)s_2 \text{ mparen}$

by the rule  $Mseq$  with  $(s_1) \text{ mparen}$  and  $s_2 \text{ mparen}$

□

## Question 2.

*Proof.* By rule induction on judgement  $s' \text{ tparen}$ .

Case  $\frac{}{\epsilon \text{ tparen}} Teps$  where  $s' = \epsilon$ :

$s \text{ tparen}$

assupition

$ss' = s\epsilon = s$

$ss' \text{ tparen}$

from  $s \text{ tparen}$  and  $s = ss'$

Case  $\frac{s_1 \text{ tparen} \quad s_2 \text{ tparen}}{s_1(s_2) \text{ tparen}} Tseq$  where  $s' = s_1(s_2)$ :

$s \text{ tparen}$

assumption

$ss' = ss_1(s_2)$

“ $s \text{ tparen}$  implies  $ss_1 \text{ tparen}$ ”

by the induction hypothesis on  $s_1 \text{ tparen}$

$ss_1 \text{ tparen}$

from the assumption  $s \text{ tparen}$

$ss_1(s_2) \text{ tparen}$

by the rule  $Tseq$  with  $ss_1 \text{ tparen}$  and  $s_2 \text{ tparen}$

$ss' \text{ tparen}$

from  $ss_1(s_2) \text{ tparen}$  and  $ss' = ss_1(s_2)$

□

**Question 3.**

*Proof.* By rule induction on judgement  $s$  **mparen**.

Case  $\frac{}{\epsilon \text{ mparen}} Meps$  where  $s = \epsilon$ :

$\epsilon$  **tparen** by the rule  $Teps$

Case  $\frac{s' \text{ mparen}}{(s') \text{ mparen}} Mpar$  where  $s = (s')$ :

$\epsilon$  **tparen** by the rule  $Teps$

$s'$  **tparen** by the induction hypothesis

$\epsilon(s') = (s')$

$\epsilon(s')$  **tparen** by the rule  $Tseq$  with  $\epsilon$  **tparen** and  $s'$  **tparen**

$(s')$  **tparen** from  $\epsilon(s')$  **tparen** and  $\epsilon(s') = (s')$

Case  $\frac{s_1 \text{ mparen} \quad s_2 \text{ mparen}}{s_1 s_2 \text{ mparen}} Mseq$  where  $s = s_1 s_2$ :

$s_1$  **tparen** by the induction hypothesis on  $s_1$  **mparen**

$s_2$  **tparen** by the induction hypothesis on  $s_2$  **mparen**

$s_1 s_2$  **tparen** by Lemma 1.2

□
